T.I.M.E. matches committed business owners who **want** help (**Clients**) with experienced business owners who want to **give** help (**Mentors**).

The unique program starts with an orientation to identify business functions that are critical to success. Mentors and Clients are matched, problems or obstacles are identified and objectives and expectations are well defined. Mentors will stay with Clients for the duration of the program. **Subject Matter Experts** will support Mentors and Clients. Evaluations are done to ensure progress.
